PROFILE

Purpose-driven Software Developer passionate about designing cloud-native, scalable solutions that deliver real-world impact. Skilled in full-stack development, object-oriented programming, and serverless architecture on AWS. Known for strong problem-solving, continuous learning, and collaborative delivery in Agile environments. Currently completing a Bachelor of Computing Systems (graduating July 2025) and ready to contribute from day one to Vector's mission of building a smarter, cleaner energy future.

TECHNICAL SKILLS

- **Languages:** Java, C#, Python, JavaScript, HTML, CSS
- **Frameworks & Libraries:** .NET, React, ASP.NET MVC, Unity
- **Cloud & DevOps:** AWS (EC2, Lambda, S3, DynamoDB, IAM), Azure, Git, GitHub Actions CI/CD, Docker (fundamentals)
- **Software Practices:** OOP, REST API design, Agile, Scrum, Kanban, Pair Programming, TDD, Code Reviews, Refactoring
- **Tools & Platforms:** Jira, Confluence, Postman, Visual Studio, VS Code, Android Studio
- **Databases:** MySQL, SQL Server, Firebase Realtime DB, NoSQL
- **Soft Skills:** Effective communicator, fast learner, collaborative mindset

EXPERIENCE

Software & IT Consultant

Wolfgang Holdings | Auckland, NZ

Jul 2023 - Present

- Developed AI-powered automation workflows integrating OpenAI APIs and Zapier, improving task efficiency and response times.
- Designed and maintained a scalable, responsive website using custom HTML/CSS components.
- Led solution architecture for cloud-enabled small business systems, including M365 onboarding and secure access provisioning.

IT Support Engineer Trainee

Pro IT Solutions | Auckland, NZ

Nov 2022 – Dec 2023

- Automated system maintenance using PowerShell scripts and CMD workflows.
- Provisioned users and devices in Azure Active Directory and Office 365 environments.
- Supported deployment of network infrastructure across 15+ sites, applying Agile and Kanban methodologies to prioritise tasks and manage dependencies.

KEY PROJECTS

PiLot Autonomous UGV (Capstone Project)

Designed and deployed a real-time telemetry system for an autonomous rover, integrating cloud-native architecture and autonomous navigation logic.

- Led an Agile team using hybrid Kanban to manage sprint workflows and adapt to resource constraints.
- Built serverless telemetry pipelines using AWS Lambda, EC2, and DynamoDB.
- Developed Python scripts and REST APIs for real-time data visualisation dashboards.
- Integrated Intel RealSense and RTK GPS for obstacle-aware navigation.
- Presented at Unitec Showcase and awarded Best Project.

AWS Hackathon – GenAI Project

- Led development of a serverless chatbot using AWS Lambda, Bedrock, and API Gateway.
- Practiced pair programming, code reviews, and rapid prototyping to deliver a production-ready solution in under 24 hours.

Rent Everything App

- Created a full-stack Android platform with Firebase Realtime Database backend.
- Built authentication workflows, role-based access, and dynamic rental logic.
- Optimised data updates, reducing redundant writes by 30%.
- Guided team on version control, CI workflows, and integration testing.

Freelance & Client Projects

- Delivered interactive websites that increased client engagement by 30–45%, using HTML, CSS, and JavaScript.
- Implemented REST API integrations and custom workflows.
- Conducted code reviews and supported incremental deployment pipelines through GitHub.

Other projects: Inventory Management System (Java CRUD), JokesWebApp (ASP.NET MVC), various small-scale web applications.

EDUCATION

Bachelor of Computing Systems

Unitec Institute of Technology | Auckland, NZ

July 2022 – July 2025

Specialisation: Web & Software Development

CERTIFICATIONS

- Microsoft 365 Fundamentals: [Certificate](#)
- AWS Hackathon 2024 - GenAI Project (Lambda, Bedrock, API Gateway): [Certificate](#)
- Microsoft Learn: [Profile](#)

ACHIEVEMENTS & PERSONAL DEVELOPMENT

- Delegate at NZ Prime Minister's Welcome (2022), representing Unitec at national innovation forums.
- Recognised for improving project deployment efficiency and reducing production timelines by up to 3× for PiLot rover.
- Active Toastmasters member completing Presentation Mastery Pathway.
- Committed to continuous learning, with experience across emerging technologies and serverless architecture.
